EXPO 2010**

**Exhibition:** Automotive Interiors Expo 2010  
**City:** Stuttgart, Germany  
**Location:** Stuttgart Messe – Hall 5  
**Stand number:** 5425

*This year 'Bonding expert' Bostik participates for the first time in the Automotive Interiors Expo 2010 in Stuttgart Germany from the 22<sup>nd</sup> until the 24<sup>th</sup> of June 2010.*

Bostik offers engineered adhesive solutions to meet the ever-increasing performance, comfort and aesthetic requirements of today's automotive interiors. A comprehensive range of adhesive products is available to solve a wide range of needs, essentially utilising all major manufacturing processes in the vehicle interior industry.

The interiors manufacturing industry is constantly evolving and looking to increase quality and looks, while at the same time reducing its environmental footprint and improve safety levels. Through years of experience in the formulation of high performance adhesives, Bostik is able to propose innovative solutions that fit a wide range of adhesive requirements and specifications.

With its global presence, Bostik is not only able to supply adhesives at any location around the world. Close partnership ensures sustainable innovation and makes it possible to take innovative new concepts from the ideation phase to implementation in production.

The Automotive Interiors Expo 2010 will provide you an opportunity to meet with our experts on bonding your interior components. Bostik is more than willing to discuss your applications and even more: help you by bringing new, competitive ideas that bring your automotive parts to the next level.
